“THE HOLOCAUST WARS PROJECT”

I. FOREWORD

This Opinion Book is published by a new company, now being formed – Project Gideon Company (“PGC”)

The timing selected by PGC’s Founders for this book’s publishing is directly tied to the insane / malignant / cultish / totalitarian / deterministic world view of the Hamas’ October 07, 2023 attack on Israel.

The Founders of this project have spent over 20 years, and a fistful of dollars, to generate a “Knowledge Base” that answers the key important questions regarding the Holocaust.

The Knowledge Base, as of today, consists of:

- Twelve books, ten of these were all simultaneously published by Amazon in June / July 2023.
- Nearly 200 “Booklets” – single issue consist of opinions / advocacy and documents.
- Numerous critiques of opinions of others
- The Knowledge Base provides answers to the fundamental Holocaust questions:
 - What happened?
 - How did it happen?
 - Why did it happen?

THE HOLOCAUST WARS PROJECT

It took more than 20 years to complete this very large-scale project attempting to:

- Explain What / How / Why did the Holocaust occur
- Provide a sizeable Knowledge Base for data, information and intelligence dealing with the Extraordinary Singularity of the fate of the Jewish people in the past three millennia.
- Propose / suggest / advocate some relatively minor changes in the presently ongoing world's largest and durable research project covering all aspects of the Holocaust. It involves stellar, stubborn and extremely laudable people and institutions.

- In the two decades of involvement with this project, we had the unique opportunity to ask many questions of ourselves and others. We proudly display these.

For instance, what made a bunch of “oldsters” (that’s a reference to the PGC Founders) to be engaged in the concentrated study of the Holocaust. They say that a startup company, run by “alte menschen” is not likely to be financeable. We do have a good answer for this question (we call it “A Killer Question”).

- In our research, we have discovered that numerous Holocaust presentations consisted of very high-profile survivors who told their suffering story, were followed by a VIP who exhorted all to never forget the pain / suffering. Then, everybody had lunch.

The above did not sit well with me. I am a Holocaust survivor, age 85, a former Israeli Paratroop Officer (although no big hero, I was a very competent warrior). I did study and learn of numerous heroic events and I insist that not only Jewish heroics get into the mix, but vast number of non-Jews, tremendously heroic, deserve the kudos and the medals.

- In our research, we quickly and frequently discovered that Jews have been accused of “blood libels” (e.g., have Christian children’s blood used on their Passover Matzah). Over time, many blood libels “stuck to Jews.”

Over the decades of our research, we discovered that different Jew haters have created whole narratives, and over time, those stuck.

- In our research, we encountered numerous examples of pure “unadulterated” antisemitism. We never stay owing the perps (derogatory for perpetrators) even if they graduated from poison ivy schools. (Where did Harvard have to dig to find 700 professors who hate Jews? – wonders never cease ...).

We want to close these introductory remarks with a promise – it consists of the following components.

- I. Having just completed “The Holocaust Wars Project,” we will shortly debut the company (“Project Gideon Company).

PGC will own the following assets:

- I.1 Structured Knowledge Base consisting of 12 books. Ten of these books were simultaneously published by Amazon in mid-2023.

These Books Comprise:

- I.1.1 A wide array of eyewitness Holocaust stories
- I.1.2 Draft manuscripts of films and plays, some fictional.
- I.1.3 Opinions / Critiques and Treatments

- I.2 Structured Knowledge Base
Consisting of Nearly 200 “Booklets”

These Booklets Comprise:

- I.2.1 Single Issues Advocacy / Background / Critiques / Documentation
- I.2.2 Single plans for Orientation / Implementation
- I.2.3 Educational “Intellectual Products,”
Professionally Prepared

- I.3 To be Implemented – Interactive Reader Services

The following Booklet: "Triumph of the Righteous" is a controversial set of conclusions.

It could be more mildly stated, if extracted from the following text phrased as: "In spite of the singularity of the Holocaust events, the worst crimes ever against Jews, humanity and civilization, the Jewish people never wilted, always remembered to sustain themselves and rebuilt their nation while their worst enemies have decisively lost their final battles."

Both titles work. The price paid by Jews was extremely high and it is still possible that the answer to "Why did the Holocaust occur?" has no fully explicable causality.
