

# “THE HOLOCAUST WARS PROJECT”

## THE IMPLEMENTATION BOOKLET

### IMPLEMENTATION PLANS

Written By: Jacob Sternberg

## IMPLEMENTATION PLANS

### 1. PREFACE

PGC will utilize the extensive Knowledge Base to implement the following plans:

- “Program 2035” is the plan associated with:

What will PGC do to generate effective programs/products to remember the Holocaust, combat the Totalitarian malignancy and respect the umbilical connection of Jews with Israel after millennia of “Homelessness.”

- “Program JV” is the plan associated with:

Effective, orderly launch of PGC including establishing business relationships with capable business partners.

This program is aimed to cover PGC’s lack of the artistic “Golden Touch” required for some products.

Together, with these two programs, PGC is likely to:

Expand its coverage of Holocaust and cover other deranged/malignant practices of near-theological Totalitarians.

Upon formation, PGC will claim to have a Very Rich Knowledge Base to enable the production of many educational products related to the Holocaust. **IT IS A TALL CLAIM.**

## 2. ON THE WAY TO ANSWERS, WE ASK SOME QUESTIONS

### CONSIDER:

- (Q1) Given: Most major German effective and vaunted industrial operations and associated substantive scientific knowhow, why did they choose to employ vast numbers of “slave labor” – undernourished and thus mostly severely underproductive, under inhumane working conditions, sanitary and medical deficiencies, knowing full well that replacements of multitudes of sick and dying workers put an undue pressure on replacement transportation, output quality, timely material supplies and cause a huge moral stigma on all who participated in these practices.
- (Q2) To what extent did the pathological hatred of Jews expressed by all the German elites unleashed in them a general collapse of humane treatments of non-Jews among them.
- (Q3) The moral thresholds associated with depraved treatment of Jews were breached, why didn't the villains go all the way – why didn't they shoot, gas or poison huge numbers of Jews at once?
- (Q4) Was there any – REPEAT, ANY – moral threshold to stop or slow down deranged practices?

[This is reminiscent of Abraham's arguing with God about how many decent people exist in Sdom (Sodom). Abraham lost, there seemed to be a severe scarcity,]

Only Satan could concoct the following true event: When the war was over, the systemic brutality of the Nazis continued. "British troops were advancing on Neuengamme (a labor camp in northern Germany)." Further:

"Hitler has committed suicide a few days earlier, and S.S. Chief Heinrich Himmler had given orders not to surrender the camps with their prisoners. Guards put some 8,000 inmates onto two ships, the Cap Arcona and the Thielbeck. On May 3, a British Air Force squadron, knowing nothing about the ships' human cargo, bombed and sank them." (El Paso Times, "Retracing a lost life," 12/18/2006).  
**The Nazis knew that German warships would be certain targets for allied bombers.**

**(Q5) Can you point to clearly stated and verifiable facts that the Nazis had moral thresholds? If you can, how do you explain the inexplicable in Nazi behavior?**

After committing incredible crimes against Jews and humanity, the Nazis had AN INCREDIBLE CRAVING FOR ALL OF IT TO BE "LEGAL."

To hate Jews, they needed to precisely define who are and why they hate the Jew. The Nuremberg Laws have multiple Jew types. They created old peoples' homes and a concentration camp for special Jew types. A vivid continuous string of stories in PGC's Knowledge Base describes life in Theresienstadt as experienced by Dr. Theodor H. Troller I ("TTI"). Theresienstadt was truly a "Potemkin Village" concoction. For Swiss visitors at the camp, especially Red Cross types, there were cafes, concerts, a children's opera was performed multiple times.

The facts about Theresienstadt do tell that the camp had built a crematorium to burn about 170 bodies per day due to high disease rates and worse: the children who performed the opera were all shipped to Auschwitz. Of the 15,000 children who came to the camp, only 100 survived (6/10 of 1%).

Another fact we gleaned from TTI letters point to a hot legal battle that TTI conducted with the Nazi legal system regarding his paternity of his alleged daughter. The Satan's offspring did have a legal system to which they stubbornly adhered to. It was based, however, on demented premises and even worse practices.

As it turns out, the Totalitarian monster regimes of the Fascist and Communist varieties (**the real partners of the Holocaust**) don't suffer from lack of legality, they suffer from caricature legal structures all based on "advancing for the common good" practices that kill individual freedoms, especially of thought.

(Q6) **The sequence of the previous questions dealt with the seeming need to explain Nazi practices. We clearly felt that AN INTEGRAL PART OF THE HOLOCAUST CONSIST OF THE INABILITY TO PROPERLY EXPLAIN THE DEEDS OF THE BEASTS.**

**A few strange thoughts have crossed our path. The common thread of these "strange thoughts" is rather simple (we like "simple"):**

(a) **We don't need "full bodied explanations" for everything we said in (Q1) to (Q5).** Let historians' struggle. They search, they argue, they bring soap to archives to wash off the dust they accumulate at information depositions and every so often they find a jewel, publish it, make a decent living and make engineering types like us think deeper and better because of their efforts.

(b) We know with certainty that when discussing, filming, arguing about the Holocaust among ourselves, we should wear kid gloves – nothing vulgar. It really is too important.

We who play or intend to play in this arena, actually know some things with certainty, For Instance:

(c) **The Fascist Totalitarians played a key role in causing the disaster.** With them, we wear no kid gloves. We use Lenin's dictum: "You stick the knife in. If it's mush, keep sticking in. If it's hard, withdraw." We should add: "Find a new location to stick the knife in."

The world is full of smallish Totalitarians. They occupy valuable seats in international bodies (U.N. and all its subsidiaries), some control governments now (Venezuela, Zimbabwe, etc.) some will soon control governments (South Africa, many countries in Africa and Central America).

This wonderful list of Jew and Israel haters is joined by most opinion-maker newspapers, very many cultural and academic institutions.

(d) Among the strange thoughts about the mass killings occurring quite often was the thankless attitude of U.S. Allies towards the U.S. – the sheriff that saved their bacon repeatedly in the 20<sup>th</sup> Century.

These Allies get weaker and weaker as the years of the 20<sup>th</sup> Century ticked away. With this allegiance deficiency, the allies became more and more APPEASEMENT ORIENTED WHICH, IN TURN, ENCOURAGED THE TOTALITARIANS TO BE MORE AND MORE AGGRESSIVE. The Allies appeasements were visible and obvious:

- Germans intervened in Spain, just prior to WWII.
- The Italians played tough with Ethiopia.
- The Japanese were ruthless with Manchuria and China.

(e) A rather frightening occurrence happened when the French Navy had to be sunk in North Africa on July 3, 1940 for fear it will fall in Germany's lap.

It should by now be clear that the term "Holocaust" is meant to encompass:

1. As context, the entire 20<sup>th</sup> Century European history – its three world wars, its weak-spined democracies with appeasement tendencies facing tough, revenge seeking extremely capable axis powers.
2. A killing machine never before appearing in numerous wars over millennia.
3. An ideologically driven, near theologically powered to believe in inevitable victories of the Totalitarian forces against unprepared European democracies who practically lost each war they were in.
4. A real 100-year sheriff, a colossal economic, military and scientific power who performed the spectacular feat of destroying three ideologically driven authoritarian empires and save both winners and losers from collapse.
5. A stiff-necked Jewish people, "homeless" for two millennia who survived an unprecedented disaster, rising to achievement of unprecedented dimensions.

### 3. SOME THOUGHTS LEADING TO CONVICTIONS

After a long and near-Herculean effort to visualize and verbalize what a decent Centennial Holocaust Memorial should consist of, the PGC Team has arrived at some conclusions, each varying in our belief regarding the importance of that conclusion.

I was told and I buy the opinion that wearing very tight shoes forces you to focus on that fact, and on the pain and suffering it produces, that you seem to have solved all the other problems that preoccupied you just before the wearing of the tight shoes.

I was also advised by many of my friends who know about the Holocaust Project that concentrating enormous efforts on “Comprehensive Solutions” may not be the better way. To attack a bunch of less-than-colossal tasks may be a simpler way of attacking big issues with the hope of a reasonable success. An example will illustrate.

Throughout all the voluminous segments that we wrote, we kept repeating the mantra that:

**WE KNOW THAT:**

(1)WHAT the Nazis did was a major CRIME AGAINST THE JEWS.

(2)HOW the Nazis did it is a major CRIME AGAINST HUMANITY.

(3)WHY the Nazis did it is INEXPLICABLE.

The mantra presents a very serious problem. The first two components are not difficult to answer. NEAR-INFINITE DATA IS AVAILABLE FROM NEAR IMPECABLE SOURCES – ARCHIVES, ACADEMIC INSTITUTIONS, MUSEUMS, AND SURPRISINGLY, METICULOUS AND THOROUGH NAZI-GENERATED DATA.

The third component is a trouble maker. Consider:

- It troubles professionals, primarily historians, who want and need to explain thoughts and deeds. They try and come out short. Some arrive, as the German historian who postulated that obnoxious deeds were actually profitable for Nazis. Assets of many types were confiscated, gold teeth, rings and jewelry augmented all the art, real estate, bank deposit boxes, etc., it all added up. Social sciences people worry that in the absence of explaining “Why?”, it is harder to analyze and understand how will Holocausts not be repeated.
- It troubles the German Government and their civil societies to have **the biblical Cain’s mark** on them. **They did make Herculean efforts to “Do Good” for survivors and instill policies and laws. It is tough to walk around with Cain’s mark.**
- It troubles several governments who worry about being tagged as having treated “Their Jews” rather badly. World War II ended in Europe on May 8, 1945. Within months of the WWII’s end, serious pogroms against Jews occurred in Poland, in Ukraine. WWII Jewish blood has not clotted yet.
- Many governments are troubled having refused to provide refuge to Jews who escaped from the European killing fields, and the news became known. **The Roosevelt solid name of wartime superior leader was soiled by U.S. refusal to accept Jewish refugees in large numbers. It is the U.S.A. that inflicted God’s wrath on the worst criminals of all times.** **It was Eisenhower who, after being solidly informed of the Nazi crimes, cut the POWs’ rations – all in anger – by 50%.**

- It troubles the Russians. Even though they had advanced degrees in learning how to cause genocides (e.g., millions dead Ukrainians left to die of a malignant Russian attempt to force starvation in “Sovietized” Ukraine), the Russian POWs were used as “Slave Labor” in the German military production plans inflicting enormous casualties.
- Worst of All, it troubles Israel and all worldwide dispersed Jews who: (1) Were the prime target of history’s worst crime and (2) Were left with incredible scars and insatiable demands for revenge against Germany and many collaborators.

We can’t believe, and are unlikely to easily believe, any explanation re: WHY did the Nazis commit all those crimes against all those people with all that venom and all that effort that only super crazies can contemplate.

- At the end of the day, none of the anger we feel matters much. Nobody, to this day, has come with a smidgin of explanation to allay any fears of genocidal replications and a repeat of a Holocaust.
- At one point in time, in 1991, when Gorbachev announced the death of the Soviet Union, a ray of hope shined in. WWII has just ended with all the hot, tepid and cold wars and battles just stopped.

A huge opportunity to rearrange world order was missed and the price is being paid today is a direct result of missing opportunities.

### Consider:

- Throughout all the writeups (eyewitness manuscripts, opinion pieces, and documentaries) we kept accusing the Totalitarian mindset with all the crimes exhibited by Holocaust perpetrators.

Every Tom, Dick and Harry, not just us, got used to compare every dictatorial creep to Hitler and all their followers as Fascists the same way that Carl Bernstein makes sure to grandly announce that any deed he doesn't like "is worse than Watergate."

Many a time I wish that we and these famous "Tom, Dick and Harry" stop the very frequent Hitler comparisons and the Watergate judgements.

Wishing won't, on its own, get us there. I don't really know what will. But, I do know that I've had reasonable breakthroughs when I forced the self-discipline required to stop shouting, talk quietly to friend and foe, put on the tight shoes to keep knowing and remembering that I can periodically take them off when I reward myself with a definitive breakthrough – even if it is just small and the scope is limited.

Having lived a long time, I further know that if I have an ingrown toenail (which hurts), and ugly zit on my cheek (doesn't hurt, but is ugly) and a serious hair loss (doesn't hurt, really isn't that ugly, yet induces long term "looks" worry) – I do not attempt a "Comprehensive Solution." I go after the ingrown toenail, when done and I feel better, I go after the zit and only then (feel better, look better) I devote attention to some Kool Aid that might do something to the hair loss (knowing full well that, at best the Kool Aid will only marginally help).

If you live long enough, you can learn a lot from just dealing with a myriad of problems you faced that weren't colossal and didn't require comprehensive visions. In 1966 (at the ripe age of 28), I became a young professor and being so proud of myself that I got a jacket with patches at the elbows and got a pipe to play with while discussing weighty issues with my "colleagues."

Today, much older and a bit wiser, I can afford to deal with convictions, beliefs, and small (yet satisfying) solutions to some annoying little problems.

I have time, so let me illustrate some of my convictions.

#### 4. SOME USEFUL CONVICTIONS

In this blessed 1966 year, I lived in New York City's West End Avenue in a many-room apartment. I did not need all those rooms, but, we leave this conviction for later in our discourse. When I just moved in, I took a shower that morning and "DISASTER" ensued ...

In the midst of enjoying the bliss of a perfect-temperature water flow, the water got instantly hot, very hot. Instead of just jumping away from the scalding water, I moved my hand quickly to the cold-water faucet. **Two bad things happened: (1) I got scalded by the hot water (2) Right after the scalding, I froze from the cold-water stream that followed.**

There are numerous lessons embedded here:

(1) You have to understand that while you are comfortably enjoying the blissful shower, somebody in the building may flush a toilet which will utilize cold water and making your shower water be hotter. Don't spend contemplation time. The system in an old building (no matter how fashionable) needs time to stabilize. Jump out and wait.

## PATIENCE IS BLISS...

- (2) If you want more benefits from the experience, you can mark both faucets (hot and cold) and prior to getting into the shower, you let the starting temperature stabilize. This will save time and water ...
- (3) If you want even more benefits from the experience, try to understand that moving to parts of New Mexico is a bad idea because the water problems (not just temperature ...) are numerous. Ask my daughter ...

## NO GOOD VIEWS CAN COMPETE WITH CONVOLUTED REGULATIONS ...

I ran several R&D companies, each usually associated with a particular technological invention. For one of these, Veripen Inc., I invented a high security identity verification system desired by the U.S. military. A member of an upper-class family in England (Aircraft and other businesses) wished to introduce this technology in England.

I took a team of engineers and joined our host in Manchester. We spent the day demonstrating the systems. By about 6 pm, we were done and all of us were hungry. Our host packed all of us into his Mercedes (he was also a race car driver). It took about an hour to get to a spectacular restaurant (“Bells of Peover”) – a very ancient monastery with gorgeous flower gardens and great décor). Like ducklings, we lined up behind our host and marched into this fine eatery.

Our host approached the maître d’ (“the penguin”) and announced his own Lordship’s name and his American guests’ wishes to honor this great eatery.

The penguin had a sad face and was sorry to make his own announcement that **HE VERY MUCH REGRETTED BEING UNABLE TO ACCOMMODATE BECAUSE THIS ESTABLISHMENT REQUIRES RESERVATIONS SIX MONTHS IN ADVANCE.**

Nearly crestfallen, our host suggested that we go back to Manchester. We all lined up and followed our host to his car.

Right then, it occurred to me that hunger is a high motivator for courageous action. I thought I detected a bit of “Too-Much-Sorrow” in the penguin’s refusal to accommodate us.

I broke all protocol. Informed our host, moving toward his car, that I will be right back. Without much ado, I turned and went back to the eatery.

The penguin smiled and looked like he’d listen. “There are two possibilities,” I said. “One is, I bribe you, and the other is you have pity on hungry Americans, which shall it be?”

He didn’t hesitate. He can’t be bribed. He owns the place. We are all welcome to march back to the bar, wait a bit, and then be seated.

Our host didn’t like it, murmured something and all followed me back.

The food was outstanding, beating the prejudice that England is not a food superpower. The bill, which I paid, was very reasonable given the quality and the atmospherics. I stayed.

The penguin came over. I asked him about a final verdict re bribe or pity. He replied “No Bribe” and “No Pity.” He is tired, he said, of pulling rank by certain British upperclassmen. He led me to a corner of the bar, pointed out a row of Cognac bottles. He informed me that the bottles have passport, real ones. Legend has it that travel improves the Cognac. “Pick” – he said, and pointed to one he favored. He named the price, I paid it. He promised to deliver to my hotel (He did.) I smiled and thanked him. I had a plausible excuse about the penguin liking of Americans.

In my long-life experience, I discovered that, at important junctures, being decisive and clear works. After all, the dinner was a less than “important event.” Other than an extra two hours of hunger does not deserve more than a trivial aggravation.

And yet, a whole big cultural lesson emanates from this true tale. Surprisingly, there is a business lesson somewhere lurking.

I gave him clear choices; he intelligently responded by refusing my formulation, he invented a counter for which he had (probably) success in the past. There was no kabuki dancing shticks attempting upmanships.

I provided this example because I am uniquely aware how hard it will be to generate, even in a small way, a meaningful Centennial Memorial with many cooks in the kitchen. Diplomacy will be a unique requirement.

There is a good reason why PGC is attempting to overwhelm the attendants of this presentation with a vast amount of data in its Knowledge Base. It is to demonstrate:

- (1.) We probably have enough stories to offer to a venture partner who is savvy in film productions. We actually produced several manuscripts very quickly to make it attractive to a partner with a “Golden Touch” when it comes to have seriously good films. We don’t have it; WE NEED IT AND WE KNOW THAT IT ISN’T CHEAP.
- (2.) Our eyewitness storylines cover a wide variety of characters ranging from Jewish heritage deniers, to Jewish intellectuals who converted to Catholicism and were still exterminated in a concentration camp designed for “Privileged Jews” (Theresienstadt). This extended to Jews who ferociously fought the hyenas with murderous “never forgive” intent (having their sensitivities “deadened” by their families’ murder) by German scientists with Jewish ancestry who took a particular revenge via becoming TRUE AMERICAN PROLIFIC INVENTOR who can proudly take credit for serious Nazis’ defeat – and as the TV commercial shouts, “We have the meats” to prove it. WE ARE LOOKING TO LINK WITH SANDWICH MAKERS.
- (3.) Our eyewitness storylines have a reasonable degree of geo-political savvy, it is based on long experience of involvement in Post Gorbachev Russia and Ukraine, major U.S.-based large-scale project with U.S.’ “Who’s Who” companies and U.S. military – ALL INVOLVEMENTS LASTING FOR YEARS.

Our eyewitness characters have extensive knowhow with advanced technology joint efforts with Israeli companies, an experience we cherish.

- (4.) We have generated Companion Manuscripts which are fictional – NONE OF THEM FAR FETCHED – for the singular purpose of focusing our and viewers/readers/listeners to our intellectual products (films, documentaries, books, plays and recordings) without worrying about the “politics.”

We give all our views/prejudices/hopes and curses (in Russian, Arabic – these are juicy – and in English to remain somewhat polite) up front and center.

PLEASE NOTE CAREFULLY:

- The “P5 + 1” Iran Deal will be, most likely, re-signed with a country that will have the bomb, will have the missiles to deliver, who wishes Armageddon, soon, who wishes death to Jews, soon, and believes that “Allah will Provide.”
  - THE HOLOCAUST IS NOT OVER. Just because the ugly Nazi and Communist Totalitarians were defeated, does not mean that the garbage they left behind was cleansed. It continues INEXPLICABLY with a new variant of malignant Totalitarians. We try hard to expose the widely expanding effect of the new siren songs.
- (5.) We have generated Companion Manuscripts which are fictional – NONE OF THEM FAR FETCHED – that deal with fundamental important beliefs.
- The realization by the U.S. intellectual enemies that defeating the U.S. requires an economy that is vastly superior to what they can marshal on their own. **THEY TRIED COMPETITION AND WERE DEFEATED.** The left has always had a vast supply of intellectual warriors. They took control of education and are at it with a vengeance.

## 5. A GLANCE AT HOLOCAUST CENTENNIAL IMPLEMENTATION OBSTACLES

- PGC believes that its mission requires the availability of films, documentaries, recorded speeches, recorded debates and plays. Each category, serves a reasonably defined purpose. The above necessitates an organized multi-year plan.
- PGC plans to start operations by mid-2023 and quickly generate realistic production targets culminating in 2035 – the very important year for Holocaust Remembrance and for PGC’s role in it. 2035 is the Holocaust’s Centennial Year given the enactment of the Nuremberg Laws in 1935.
- It seems important to have a maximum impact memorial thus necessitating the generation of “Intellectual Products” quite early.
- PGC realistically expects multiple impediments that will, most likely, affect implementation:
  - PGC is too new, too small (and “Who has ever heard of them ... ) to even attempt to have and execute a plan that is so very ambitious.
  - We expect many countries, multiple international organizations, a gaggle of Jewish organizations – all for rational reasons – to “combat” for a role in the Centennial Memorial(s).

- From the start of 2023 to the start of 2035

There are 12 years to get very much done including:

Educating a diverse (and difficult) audience with preparatory education products, producing high quality interesting center pieces for the Memorial, testing audience reaction to films, documentaries and books and, God forbid, making non-trivial changes midway.

- Assuming that a “Realistic Product Line” – satisfying (more or less ...) the “Maximum Impact” objective – is decided early enough. What is it?

We list the product line.

- Taking the obstacles into account, PGC decided to enter the fray with an impressive debut.

## 6. “COMBAT” FOR POSITION IN THE HOLOCAUST MEMORIAL

- Many nations have suffered from huge genocides by their own leaders. The 20<sup>th</sup> Century saw frightening examples. Stalin confessed to Churchill having to get rid of millions of Russians who didn't follow his dictat. Mao, unleashing “Permanent Revolutions” did even more killing than Stalin. Pol Pot did mass Cambodian killings. Many sizeable minority groups were killed en masse on all continents, including indigenous people in South America, Uyghurs in China, religious minorities in Syria, female babies aborted en masse in China and untold number of ethnic groups in Africa.

Many of the victims in the above categories couldn't and still can't express their grievances in a suitable way. There should be zero doubt that the brutalized people will seek a U.N.-type memorial yearly event sponsored by this seemingly authoritative institution. Given that the large number of members in the General Assembly will cause a flowery resolution to pass and as usually happens, it will be filed – they are experts in filing fine resolution ...

WE FORECAST THAT NOTHING CONSTRUCTIVE WILL HAPPEN. REMEMBER “THE YEAR OF THE WOMAN” A U.N.-SPONSORED EVENT – IT OCCURRED IN CHINA WHILE CHINA WAS MASSIVELY KILLING FEMALE BABIES BECAUSE THEY GROW UP TO BE WOMEN.

In frustration, the aggrieved people might agree to a U.N. sponsored “Day of Remembrance” for ALL the victims. That is bad enough but it could be much worse, the “Victim Group” might include the Holocaust victims. The worst crime in history will be severely diluted, it will wind up as a well filed set of speeches about “how awful can man be to others.”

- Many nations believe that they have suffered terrible injustice given repeated accusations of atrociously mistreating “Their Jews” during and after the Holocaust killings in 1939 to 1945. Poland, Ukraine and the Baltic states have been accused of killing Jews during the period that the Molotov-Ribbentrop Agreement was in force. Poland was divided into Russian and German zones in 1939-1941. The Russian “Sovietized” their Polish zone to the chagrin of the Polish citizenry. Same happened in the Baltics. The irate citizenry tended to blame Jews for supporting collectivization of the economy and loss of their freedoms. Some Jews may have supported the “Sovietization” steps and thus became targets of hate. It wasn’t hard at that time to support Soviets preferably over the Nazis. Historians have viciously argued to this day about this in numerous professional journals and conferences.

WE FORECAST, AND IT ISN'T HARD TO DO, THAT NOTHING CONSTRUCTIVE WILL HAPPEN OTHER THAN SOME FINE RESOLUTIONS WHICH, AS TRADITION PREVAILS, WILL BE PROPERLY FILED. COUNTRIES LIKE POLAND, LITHUANIA, LATVIA AND UKRAINE WILL VOTE FOR SOME "DAY OF REMEMBRANCE" WHICH WILL COVER ALL AGGRIEVED.

PGC BELIEVES THAT WHATEVER DIPLOMATIC WISDOM AND LUCK WILL BE OPERATIVE, THAT **POST-WWII POGROMS, SOME IN 1945 (IMMEDIATELY UPON WWII END), IN POLAND AND ITS NEIGHBORHOOD WILL BE SEPARATELY AND INTELLIGENTLY HANDLED.** YOU DO NOT SPILL BLOOD THAT HASN'T CLOTTED YET FROM THE MALIGNANT HOLOCAUST. ADD: NEVER AGAIN.

- There are a significant number of nations who would want to have a say, in whatever form, in the unsponsored "Day of Remembrance" because they significantly contributed in defeating the Nazi-Alliance. The Russians are an obvious example of this class. Because their investment was actually huge, they will demand a leadership position in the drafting of resolutions **and, most importantly, they will demand a leadership position in the planning and execution of the Holocaust Centennial Memorial event(s).** As U.N. tradition shows: "Whatever Lola wants, Lola gets." Songs are rarely wrong ...)

Several other nations will attempt to show (and some actually did) that they accepted Jews as escapees from the European Hell during Nazi rule and several years thereafter. China is among those, as were many mini-dictators in mid and South Americas.

- Adding to all the above are a sizeable group of nations, Israel-hating countries, who love to accuse Israel of causing “Holocausts” for Palestinians – many of whom will join **ONE HUGE COMMITTEE WHO WILL CREATE AN ABOMINATION OF A CENTENNIAL HOLOCAUST REMEMBRANCE.**

It is near certain that, if the huge committee will actually exist, the above result is near obviously certain.

- The real threat to a dignified and fitting Holocaust Centennial Memorial may come from rather surprising quarters.
  - Assuming the U.N. committee (huge, very diverse, very noisy, low morals, low morale, many Jew and Israel hating, well-spoken and groomed) was formed and tasked with planning and executing the tasks of creating a historically fitting event of monumental stature.

It is easy to forecast the automatic visceral Israel displeasure pointing to all the ideological faults that will be there – with certainty.

SOMETHING WILL HAVE TO GIVE:

(1) Either Israel withdraws from participating in this shindig, and creates one of its own

OR

(2) Israel diplomatically succeeds to convince the U.S., Germany, Britain, Sweden, Finland, Denmark, Canada and Poland to join a separate and distinct event, separate from whatever the U.N. committee will do (including the case that it will do nothing.)

There are reasonably adequate reasons for including each of the mentioned countries. We will cover the reasons below.

- It is not difficult to forecast German displeasure with such an “exalted committee.”

Given what Germany has done re Holocaust, it wants, needs, and will extend all effort to remove the Nazi curse from its body politic. To date, it has made Herculean efforts to help survivors. It needs to come clean; the Centennial Memorial is its ticket.

It needs to be unequivocally on Israel's side on this one.

- The U.S., as the major victor over the Fascists, and the major victor over the seemingly undefeatable revolutionary Socialist worldwide alliance, needs one more exhibition of its power. The Nazi-centered alliance was pure evil.

The Holocaust was a logical outcome of a pure evil malignancy. The U.S. was the exemplary pure good sheriff who, in three world wars in a row showed how the world was saved, HOW GENEROUS THE SHERIFF WAS EVEN WITH EVIL LOSERS and it is now BEING TESTED AGAIN.

The mixing of all grievances with the Holocaust, does not allow a new U.S. message to be broadcast clearly.

The new message by the U.S. must have RED LINES TO NEVER BE CROSSED.

BY PRESENTING VERY FEW RED LINES WILL MAKE STRONG RESPONSES RARE, YET CERTAIN.

A Fine Example: NO NUKES FOR IRAN.

IRAN WANTS A “FINAL SOLUTION” FOR GOOD, IT HAS ALL THE TOTALITARIAN MALIGNANCY OF THE NAZIS, IT HAS STRONG POWERS’ SUPPORT – CHINA, RUSSIA, AND IT HAS THE FUNDS IT FOOLED THE WEST TO SUPPLY FOR DECADES NOW.

- Britain has had the IMMENSE GUTS, AND CHURCHILL’S RESOLVE TO BE ALONE, when Nazi fortunes seemed overwhelming. The Brits are likely to do the opposite of French action. As Hemingway is my witness, vénalité and stupidité will cause the French to be in a typical U.N.-type bind, requiring their Navy to be sunk ...
- Finland and Denmark have been tough little countries (They can’t help it. Their languages are so tough to master, they must rely on good deeds to be liked). The Finns fought the Soviets at the early WWII stage and recognized the reality of being neutral for the second part of the 20<sup>th</sup> Century – but now they had enough, since the butchery in Ukraine.

- Sweden, the customary neutral, has had it with Russian butchery in Ukraine and is likely to part from typical U.N. treatment of evil doers. A U.N. committee of renegades will not now be their choice.
  
- In WWII the Danes have exhibited an unusual courage. They shipped “Their Jews” to neutral Sweden, thus saving most of them. **It was their pesky insistence that allowed Red Cross to visit the Theresienstadt Concentration Camp, helping the awful inhabitants some moments of respite.**

## 7. TIMING CONSTRAINTS

- We wish to mention timing constraints, early in the analysis and forecasts because of simple “Facts of Life” associated with this large project.
  - **Leaving the details for later, it is possible to determine the products we will need to have for an impactful Centennial Memorial in 2035.**

The “Intellectual Products” fall into categories:

- PRIMARY – “MUST HAVE” FILMS
- PRIMARY – “MUST HAVE” DOCUMENTARIES.
- PRIMARY – VIDEO PRESENTATION – “GOOD TO HAVE”  
RECORDED SPEECHES  
RECORDED DEBATES

- The Primary – “Must Have” films category implies at least three films – each attractive to a specific targeted audience. Each is a “Flagship” category allowing other films to be linked to the particular primary film.

The Primary Films have the following targeted viewers:

- GENERAL PUBLIC
- PRIMARILY JEWISH PUBLIC
- PRIMARILY JEWISH YOUTH

SEE IMPLEMENTATION PLAN FOR SPECIFIC FILM  
SCRIPT OUTLINES.

PGC believes that the general public-targeted film will have to be first out of production. However, to make it an effective film, several secondary products are necessary in order to gain context – understanding by the viewers and having better reviews.

- The main mission of secondary products is to provide a solid background for the “Golden Touch” artists who’ll be given a “Finished Script” for every product. Given the forecast this far, we estimate 12 years – although seemingly a long time – are actually insufficient to have the first-rate products that PGC feels obligated to produce.

However,

PGC IS QUITE FORTUNATE TO HAVE HAD ITS FOUNDERS SPEND MANY MAN YEARS TO GET A KNOWLEDGE BASE THAT WILL ENABLE ITS MISSION TO HOPEFULLY SUCCEED.

In simple terms, PGC can compress production by a rough estimate of 50%. This capability may not likely be available to future competitors.

- For the moment, we pause from discussing products’ readiness in time by highlighting certain additional advantages of PGC founders:

The principals have considerable multi-decades experience

- Involving major solution (including patented inventions) for the U.S. Military and the very large U.S. corporations (ADP, American Express, AT&T, Burroughs, Cargill, CBS, Exxon Systems, numerous banks, IBM, Singer, Siemens and others).

WE NEVER FAILED TECHNICALLY.

- Having always worked with upper-level management, PGC founders have understood the value of diplomacy. **NOTE, PLEASE, that when we outlined the potential obstacles we'll face, we "forgot" to mention that the biggest time-consuming obstacle will be the "hand-to-hand" combat among the Jewish organizations about their roles.**

They are smart, have serious muscle and some don't take prisoners when they deem the fight important.

**PGC will – we promise – respect our elders and in many ways, our betters.**
