

THE PROJECT GIDEON COMPANY

EXTENDED MISSION STATEMENT

- PGC Founders having studied the Holocaust events for two decades and generated a vast knowledge base (See Attachment A, "Knowledge Base")

AND

- PGC benefitted from the enormous, largest ever intellectual research project – worldwide – undertaken by stellar institutions and highly competent researchers who toiled – for over seven decades to gather, record, organize and data mine to enable answering the key fundamental questions

"WHAT, HOW, WHY" DID THE HOLOCAUST EVENTS HAPPEN?

AND

- PGC believes, unalterably, that the Holocaust events are unique / singular because:

They are the worst crime in history against the Jews by virtue of What Factually Happened.

They are the worst crime in history against humanity by virtue of How They Were Executed.

They are the worst crime in history against civilization by virtue of Why They Were Undertaken and Executed leaving immense intellectual refuse in need of enormous cleansing.

GIVEN THE UNALTERABLE BELIEFS, PGC HAS UNDERTAKEN THE FOLLOWING MISSION:

I. Join what it defines as a legitimate warrior.

Independent of its size (tiny at the beginning),

Independent of its startup status

(“Startups have numerous reasons to fail”).

Independent of the immense prerequisite knowhow, expense, turf fighting savvy, lobbying and financing burdens, it believes that it can actually be helpful in solving serious problems.

Attachments A, appended to this Mission Statement, provide the justification for PGC beliefs and that it can and will be a productive warrior in the Holocaust Wars.

II. PGC'S MISSION AS A WARRIOR

- PGC believes that an extremely poisonous narrative that combines ultimate hatred of Jews and Israel has had an enormous successful penetration of international organizations, international media, academic institutions worldwide, international economic entities, social and entertainment entities ...

And, due to the totality of the acceptance of this narrative, the effects are detrimental for Jews, for Israel and civilization itself.

- PGC will do, all it can, to kill this narrative.
 - First and foremost, we will define and articulate precisely what this narrative is.

Surprise, surprise, this actual powerful narrative is not a single text. It consists of multiple, sometimes conflicting, collections of grievances, theological imperatives, curses in multiple languages and Garden of Eden utopias and hellish dystopias.

Hitler had Mein Kempf disclosing exactly what he wanted to do and why. Mao had the little red book unleashing the youngsters to have a "Permanent Revolution," and melt all metals in China for the glory of the revolution. Gaddafi had a green book equivalent.

PGC has undertaken to put some order in the cacophony by producing several semi-logical versions to assist us to slay this dragon.

- We volunteer our first text which we call “The Arab Narrative” consisting of reasons to hate Jews and Israel.

Attachment B provides, in a single page, ten primary points of the narrative.

The refutation of this narrative is provided by multiple single-issue booklets (See Index, booklet titled “Refuting the Arab Narrative”).

- In the midst of the volunteering by PGC to help the cacophony-stricken enemies, we add a humorous short reminder to anyone who wants to boycott anything having to do with Israel and / or Jews. Please see Attachment C (titled “Supreme Leader Urging Jewish Boycott,” Booklet Z014 in the Index).

- The second narrative, hereby volunteered by PGC, is “The Anti-American Bug” that has been infecting a vast number of nations, international institutions, academia and media for the entire 20th Century. We chose a humorous version by very astute thinkers. [See Attachment D, Booklet Z156, in our Index, titled “The Anti-American Bug”]

To avoid tiring the reader excessively, we lump together Argentina, New Zealand, Harvard and other poison ivy academies and remind them of their sins in several other booklets in the Index.

The overriding reason to define the different cacophony narratives is to:

- Present respectfully – even to our enemies, that they actually, so far, won to date, the critical debates between our ideology and their cacophony “propaganda bouillabaisse.”
- Thus, we want to beat our enemies using their propaganda battle tactics.
- We respectfully, and with awe, remember Orde Wingate (a British General in WWII) who wisely suggested to “Beat your enemy with his own weapon.”

- III. The third narrative we chose to present covers the thesis advanced by the enemies of Jews and Israel we call “Buffering the Truth, or as Churchill postulated, “Terminological Inexactitude.” It involves the reciting of history where not a single fact cited, nor opinion presented, can be even remotely truthful.

This narrative is based on the deep belief by our enemies that “truth” is so important and precious that it must be guarded by serious guards – consisting of strong lies.

This narrative is further based on very frequently repeated lies that violate common sense and, in many cases, are so ridiculous that laws of physics are violated.

Attachment E provides an example that illustrates this narrative. It also provides important evidence by reliable sources re the practice of mega “buffered truth” productions involving the Middle East.

The third pillar of the PGC mission is to alter the obscene views of Jews as deserving of a millennia long victimhood fate (pogroms, atrocities, blood libel targets, conspirators of serious crimes associated with religious, economic and cultural wellbeing of their host countries' populations).

Culminating with the Holocaust and the refuse left behind, this third pillar of its mission, requires PGC to have the chutzpah (gall) to call some events in the distant past, many events in the recent past, some future events PGC forecast given the insane present "weltanschauung".

NO OTHER MISSION EXCEEDS THE IMPORTANCE OF THIS TASK. THE READER SHOULD NOT, FOR A MOMENT, FORGET THAT MANY JEWS HAVE THE DUMB VIEW THAT THEY ARE HERE CHOSEN TO SUFFER.

There are two primary efforts to deal with the victimhood disease. We are up to trying both:

- The first by an alternative "new Jewish narrative" by an alternative new Jewish narrative (See attachment K Z???)
- A significant set of deeds

IV "The new Jewish hatred can be beaten:

- Two major world religions – Christianity and Islam – were born from Jews' original formulation. Major Jewish grandees are worshipped and revered by non-Jews.
- Nothing in their past requires Jews to force conversion of non-Jewish, or G-d forbid kill non-Jews who won't convert.
- The ten commandments provide very admirable life rules.
- Historically, many countries, rulers, empires invited Jews, because of their learning and knowhow, to improve countries and regions economic well being.
- In a world where discovery and science have contributed to the wellbeing of everybody, including the lower classes, Jews contributed in a way never before even imagined. The Jews constituted 0.2% of the world population they received 22% of all Nobel prizes. It is 110 times their representation. We dedicated a special set of booklets to the analysis of this phenomena. A glance at the Wise and Unwise Jews (booklet Z156) will be helpful.

V The fifth pillar of PGC's mission can be thought of as a "new Jewish narrative" to beat the Jew hatred by specifically showing clear heroics in the face of unimaginable odds.

It started over 3200 years ago, when Gideon, a tribal Jewish chieftain, almost a king, used 300 well trained men to defeat a huge army in a night attack, quite inventive, preventing the demise of Jews.

- It followed Jewish fights with the Babylon and Roman empires, both fights lost, dispersing Jews the then civilized world.
- The Jews never forgot Jerusalem, never wilted, never yielded their fundamental beliefs even when they outwardly seemingly converted (Spain 1492).
- On Jewish fasting days, when the Nazis offered food, many emaciated, hungry camp dwellers reused this satanic offering.

VI The sixth pillar of PGC's mission can be thought of as a "new Jewish narrative" specifically targeted at insane hatred of Israel. This is especially attractive to serve as a truly powerful attack, against the real culprits, the obvious UN "world government", and the appeasement brigade of the EU. It allows the engulfing of a large number of small totalitarians in Gordian knots they can't untie.

Many Arab League countries have realized that the middle East needs a new order. The anti-American bug is stupid. Iran will be subdued. China will have to make the only smart energy supply deal (with the US). The US is not willing to self destruct by stupid multi-trillion dollar burden when no one else is contributing to clean air. Government controlled economies produce shoes, but all for the left foot. To state it briefly, the Abraham Accord can be made to work.

VII The seventh pillar of PGC's mission will be a robust destruction of the memory of the Nazi military and economic superiority. As it turns out, the entire Nazi plan of a four front major world war, the fourth being the war to exterminate all Jews, is not comprehensible because it could not be successful.

PGC believes that the seventh pillar will heavily contribute to rather interesting reevaluations of the actual definitions of the term "Holocaust", the size (of that and other effects), the role of 250,000 SS management cadre of PhDs, the insane eugenics, the psychiatric cartel and the actual inability of the pseudo geniuses to overcome even minute failures.

VIII The eighth pillars of PGC's mission consists of convincing, whoever will listen, that the dominant factor that made the twentieth century the worst is the totalitarian malignancy/dementia -- the midwife of all atrocities.

This involves having the chutzpah to tell all who will listen:

- Ukraine has had a “distinguished” near Holocaust history, an especially in near Holocaust events in 1919.
- Poland has had unusual countrywide pogroms within months of the end of World War 2. Jewish blood has not yet clotted.
- Hungary had numerous World War 2 major anti-Semitic episodes and has 30% of its population hating Jews today.
- Argentina has made major attacks on Israel's embassy and Amia centers in 1992, 1994, welcomed Eichmann and satanic Dr. Mengele.

The above is just a short recital of facts. Numerous facts were omitted, for example:

- New Zealand world maps omitting Israel
- Australian major demonstrators to “gas the Jews”
- US Presidents of its poison ivy colleges hold incredible views for which they do not blush, they resigned and even today they still don't know why

- IX The ninth pillar of PGC's mission consists of convincing, whoever will listen, that all factual information emanating from the mid-East sources consists of a disease invented by Churchill called "Terminological Inexactitude" (1906 House of Commons). These sources are so infected that it is very difficult to listen to facts that the laws of physics are crying in frustration. The allegation of mid East information being one big blob of "buffered information" is quite severe and requires a thorough examination. PGC accepts the challenge and provides an Attachment F, just for this purpose. The really sad fact of this allegation is not so much that the "bad guys" lie (or buffer the truth), it is that the not too many "good guys" left on this planet thoroughly believe in the false data and reward the "bad guys" for their "moderate views". One of, and not the only one, of the sources for these allegations is no other than the NY Times. We are not enamored with the NY Times. However. We are in awe in this case.
- X The tenth pillar of PGC's mission consists of cleansing the refuse left behind from the demise of the fascist Holocaust wars and Soviet empire's 46 year attempt to build a communist utopian world order. Attachment G provides the reasons for advocating practical plans for generating specific intellectual products consisting of documentaries, films plays and recorded debates covering multiple topics.

The centennial events will demand extensive attention to multiple tasks of managing non ad hoc presentations.
